

XYVID PRO

XYVID Pro is a webcasting software solution with a look and feel unmatched in today's market. Our platform creates an experience that enables participants to retain what is being presented on screen. We are the preferred choice for companies looking to brand themselves in the best ways.

Dynamic Screen Movement

Keep your audience's attention by resizing your slide and video windows throughout the presentation.

Custom Look and Feel

Our software allows you to highlight your brand. Everything from a fully customizable landing page to a player can be molded to your brand's colors.

Engagement Score

You have the ability to score the attendee on how engaged they were during your virtual program, and for it to be available in one cohesive report at the end of the event.

CPE (Continuing Professional Education)

You can track time and polling requirements for certificate-based training. Once qualified, attendees can download it straight from the platform.

Xyvid Pro Connect

Our in-room mobile application allows live meeting participants to use all engagement features and the virtual audience in real-time.

Complete Hybrid Event Solution

We can also manage your in-person experience by leveraging our expertise and knowledge when it comes to live events.

Global Reach

XYVID is the perfect partner for digital engagement, providing reliable broadcasting and engagement to viewers around the world. Our physical offices and cloud-based software are strategically located to ensure seamless support for events of any size or location. Let us help your message resonate with an engaged audience.

GLOBAL COVERAGE

XYVID's strategically located physical offices and cloud-based software ensure seamless support for any size event in any location. Our experienced team can manage all aspects of your event, from pre-event planning to post-event deliverables, and our local presence allows us to provide quick response times and 24/7 support for your peace of mind.

LEADING CDN

Trust XYVID for reliable global coverage and optimal delivery of your content. Through our partnership with Akamai, the world's largest content delivery network, our platform ensures a seamless viewing experience for your virtual event, regardless of where your viewers are located. With XYVID, you can confidently engage with your audience worldwide.

COMPATIBILITY AND SECURITY

XYVID is compatible with all devices and browsers. The system is built using HTML5 technology and utilizes cloud-based environments Wowza, Azure, and Akamai for optimal performance. Our system is SOC-compliant, and data is securely protected. You can ensure reliable broadcast quality for participants by using redundant connections and Internet service providers.

Event Services

XYVID Pro is a more brilliant virtual broadcast platform that allows viewers to experience and engage in your presentation. Promote their involvement and retention through our dynamic platform and Engagement Suite. Let your brand shine with players that are customized to your colors. All of this increases your brand name recognition and longevity.

Webcam Events

Greet your audience from the comfort and convenience of your home or office all while using a video conferencing platform your already familiar with! The production team at XYVID can integrate your video signal into the XYVID Pro Platform and connect you to your attendees around the globe.

In-Platform

With no need to download any application you can present straight from your browser. All you need to do is log in to the XYVID Pro platform, and our production team members will move you on and off stage. They even have the ability to put multiple presenters on the stage at one time.

Virtual Studio Production

Mimic the look and feel of a studio-based broadcast, all while your presenters stay at home. Our production team will acquire and mix your show and encode it from one of our production suites inside our Broadcast Center outside Philadelphia.

On Location

Our production team can find and source quality video production studio partners near your presenters. This allows us the ability to recreate a broadcast-style look for your presentation.

Virtual Events

Connect your audience around the globe!

XYVID Pro was developed with an emphasis on the viewer experience. We want you to be able to deliver your message with the look and feel of an enhanced television broadcast.

XYVID Webcast Studios

We understand that time, travel, and transport of necessary equipment shouldn't be a burden. To address this need, we have different options on where your webcast can be produced.

Webcast Set Design Services

To create a truly memorable webcast experience for your viewers and to enhance your brand message, a XYVID set design can complete your vision with a multitude of options.

Budgeting, Pre-Production & Planning

Our sales team will walk you through the options that are right for your webcast production budget. We will assist with ensuring each line item is effectively budgeted.

Recent Accomplishments

Accommodated client's needs to pivot traditional studio-based events to an all virtual event.

XYVID Production Manager & Ops Directors created a virtual studio setup leveraging mixing software to achieve the TV look & Feel.

Engineering reimaged how signal is acquired by creating a Signal Acquisition room with NDI technology with redundancy built into each production room.

Production adopted a network-based intercom system to allow for the remote director to call their show!

Production Value

#PresentBetter
with XYVID

XYVID can handle a number of different style broadcasts, ranging from live (on location) events, virtual events (streamed over the internet) and studio productions - like that of the news, featuring multiple camera angles, sets, and lighting!

Live Events

Live events take place on location with an in-room audience where speakers and presenters will be present!

Virtual Events

Virtual events are events that run in real-time over the internet in which speakers and attendees are brought together via our XYVID Pro Platform, acting as the event location.

Studio Production

Studio productions place all speakers and presenters in one, professional, TV studio environment and broadcasts, over the web, to audiences around the globe!

Highlights

XYVID provides all necessary gear for streaming and runs two simultaneous streams for redundancy.

Partnered with studios through the country in order to remain convenient for your presenters and event.

Can handle all A/V needs for live, in-person, events from rigging to screen displays and lighting.

A XYVID Webcast Engineer and Producer assigned to, and placed, your show at all times, including pre and post show business.
