

“Pexip elevates its offerings from simple to excellent by catering to healthcare service providers’ needs, leading the Australian video conferencing services market in the healthcare sector. It offers easy integration into business workflows, API integrations, and integration support. Pexip also suggests efficient and proven healthcare delivery workflow from around the world, all protected in a tight security layer. The company’s HIPAA compliance services enable easy and stress-free adoption by healthcare providers. With the help of Pexip’s support team and facilitated by its healthcare provider community, a forum for the exchange of best practices, healthcare providers can continuously improve their services.”

AUSTRALIA VIDEO CONFERENCING SERVICES IN HEALTHCARE INDUSTRY COMPETITIVE STRATEGY LEADERSHIP AWARD

Frost & Sullivan commends Pexip’s ability to make its video conferencing services for health better than in-person patient visits to physician clinics. Healthcare providers benefit from flexible hosting options that allow them to operate video conferencing from on-premises, public/private cloud, or hybrid cloud. Meanwhile, patients can join virtual clinics with just a single click using a web browser or other applications from any device. This democratizes healthcare services while making service delivery through video conferencing more cost-effective. Pexip’s solutions go beyond video conferencing services, offering workflow suggestions and integrating business applications and databases. The 2021 Frost & Sullivan Competitive Strategy Leadership Award in Video Conferencing Services in Healthcare Industry acknowledges Pexip for enhancing healthcare services for 13 million Australian residents.
