Pexip Professional Services

# Direct Peering Installation

Pexip Direct Peering interconnect provides a direct connection from the customer's video conferencing devices to the Pexip Service cloud. All traffic (signalling, media, phonebooks, management, etc.) will flow over this direct link.

## Pexip Direct Peering provides the following customer benefits:

- **Security** - Direct layer 1 (or layer 2), switch to switch connection between the customer and Pexip Service cloud, ensuring that traffic does not traverse the internet.
- **Performance** - Reliable, consistent, improved quality of service and user experience through dedicated capacity and improved management of traffic flows.
- **Diagnostics** - Speed in identifying and resolving issues.

By using Pexip Professional Services, you can install the Direct Peering interconnect reliably, quickly and cost effectively. Pexip will ensure the successful activation, through the use of its highly trained and experienced technical experts.

## Benefits

**Quality** – Every installation is performed to exacting quality standards

**Speed** – Optimized delivery and deployment process

**Value** – A fixed-price, fixed-deliverables service

## This service includes:

An assigned Pexip Project Manager/Engineer to control timelines, coordinate teams and activities and advise on end user communications

Direct peering interconnect in 1-2 data centers

Oversight of the configuration and remote activation of the Direct Peering solution

Provision of guidance on network bandwidth, call routing and Pexip Service cloud requirements

Review of customer call routing requirements and network readiness

Liaison with Pexip network and video operations for configuration of the Pexip Service cloud

Support during cutover
