

Secure video conferencing for schools and universities

Learning is no longer confined to the classroom. Adapt to changing times with a simple, flexible video platform to engage students from anywhere.

Pexip enables distance learning and hybrid virtual classes for both K-12 and higher education, making it simple for students and teachers to stay connected. With easy-to-join classes, content sharing, and live streaming and recording, you can create a rich learning environment from any location. Pexip natively integrates with Microsoft Teams and Google Meet, and can improve administrative communications by simplifying workflows across existing technologies.

Learn from anywhere

Students can join a virtual classroom however they like, via our desktop or mobile apps, or through a web browser with no downloads or plugins required.

Scale on demand

Pexip solutions can be scaled on-demand to accommodate increases in capacity and to extend your geographic reach.

Customize your interface

Tailor your virtual classrooms and auditoriums to match your organization's unique learning environment with Pexip's customization options.

Live stream & record

Stream content from your virtual classroom to third-party platforms like YouTube or Kaltura for live online events or on-demand video content.

Integrate with existing tools

Keep your current workflows by integrating Pexip with your existing tools for a seamless experience.

Improve campus & admin communications

Use the same solution to improve administrative communications across dispersed campuses or school districts.
