Pexip Professional Services

Infinity VMR Scheduling for Exchange Installation

Schedule Pexip Virtual Meeting Rooms directly from your Microsoft applications!

The VMR Scheduling for Exchange feature allows you to create an add-in that enables Microsoft Outlook desktop and Web App users, in Office 365 or Exchange environments, to schedule meetings using Pexip VMRs as a meeting resource.

With Pexip Professional Services, the VMR Scheduling for Exchange is installed reliably, quickly and cost effectively. Pexip will ensure the successful installation and integration with your Microsoft environment through the use of its highly trained and experienced technical experts.

A Pexip Professional Services Engineer will oversee the entire process for you.

Benefits

Quality – Every installation is performed to exacting quality standards

Speed – Optimized delivery and deployment process

Value – A fixed-price, fixed-deliverables service

This service includes:

Remote integration of the Pexip Management Node with your Microsoft Exchange server

Configuration guidance for integration with all ancillary services, such as DNS, NTP, Active Directory, syslog, and others as applicable

Configuration of the Pexip Infinity platform for integration with the Exchange and Outlook scheduling workflow, to include:

- 1 scheduling template
- 1 Active Directory security group to control access to the scheduling add-in
- Branding and customization of the scheduling template

Quality Assurance – system testing against an agreed test plan
