Pexip Professional Services

# Smart Scale Activation for Infinity

The control and security of a self-hosted deployment with the ease and scalability of a shared cloud service.

Organizations today require a private and secure video solution that is easy to deploy and manage, with the ability to scale up and down with changing demand and organization structure.

The Pexip Private Cloud provides the data control and transparency of our self-hosted software deployment with the ease and scalability of a SaaS solution. Conference management is hosted by the customer, while the compute needed for call capacity is deployed by Pexip in a secure and private, customer-dedicated instance.

By using Pexip Professional Services, you can enable the Smart Scale for Infinity feature reliably, quickly and cost effectively. Pexip will ensure the successful activation, through the use of its highly trained and experienced technical experts.

**A Pexip Professional Services Engineer will oversee the entire process for you.**

## Benefits

**Quality** – Every installation is performed to exacting quality standards

**Speed** – Optimised delivery and deployment process

**Value** – A fixed-price, fixed-deliverables service

## This service includes:

- Coordinating project planning meetings
- Consulting on network/VPN requirements
- Consulting on supported cloud providers
- Completing the network VPN questionnaire with the customer
- Leading the remote on-boarding workshop
- Verifying Pexip infrastructure readiness
- Reviewing Pexip locations and call routing requirements
- Installing the Pexip Smart Scale software license
- Configuring the Pexip Smart Scale feature
- Activating the Pexip Private Cloud connection
- Creating a Pexip Smart Scale location
- Quality Assurance – system testing against a standard test plan
