Pexip Secure Meetings for Healthcare

Secure video for today's health systems

A flexible video platform designed for clinical workflows and data control

Pexip Secure Meetings for Healthcare is designed to enhance how care is delivered inside modern health systems. From virtual patient observation and rounding to multi-disciplinary consultations, Pexip enables secure video communication that fits existing rooms, devices, and clinical workflows. The platform can be configured and extended to match how your teams work, including integrations with clinical systems, all deployed in the secure environment that best meets your needs.

Secure deployment options

Pexip Private Cloud ——————— Sovereign Cloud ——————— Government Cloud ——————— On-premises

Patient confidentiality for every interaction

Comply with healthcare regulations and retain control over sensitive patient data, video traffic, and consultation records.
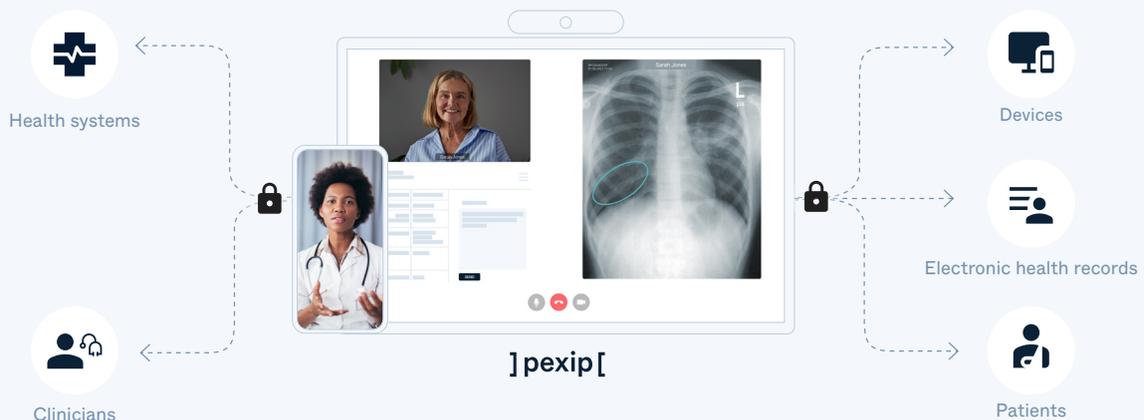

Virtual care that fits your workflow

Integrate secure video directly into existing clinical systems, room setups, and electronic health records.

Scale care without scaling complexity

Support high volumes of clinical interactions reliably and securely, across inpatient and outpatient settings.

Collaboration for the full clinical ecosystem

Product specifications

Pexip puts healthcare organizations in control of where video runs, how data is handled, and how access is managed, supporting HIPAA-aligned care across environments.

Key features

- **Integration with EHR systems:** Integrate video into existing healthcare systems and workflows.

- **Fully interoperable, high-quality video across devices and rooms:** Patients can access care from any device with full HD video and data sharing.

- **Configurable and customizable user experience:** Design and tailor video layouts, roles, and user experiences to match your clinical workflows and operational needs.

- **Simple experience for clinicians and patients:** Easy for first time users to join, so time can be spent on diagnosis, not technology.

- **Deployment choice and control:** Align with your security requirements; deploy on-premises, in a private cloud or in a public cloud.

- **Security and Privacy:** Compliance with healthcare regulations such as HIPAA, GDPR and other local data protection laws.

Key specifications

- Multi-protocol support: SIP, H.323, WebRTC, RTMP, Skype for business

- Requires no participant downloads or plugins

- AES-256, TLS 1.3, FIPS 140-2

- Supports HIPAA-aligned deployments

- Authentication (OIDC/SAML)

- GDPR compliant

- Custom branding

- Audit trail

- Secure lobby/waiting area

- Policy-based access control for internal and external participants

- Accessibility verification, WCAG 2.2 AA and VPAT Section 508

- Launch video calls from EPIC MyChart, Hyperspace, Haiku, Canto, and EpiCare

Independently verified

Pexip solutions are independently verified by third-party bodies, highlighting its commitment to security, reliability, and compliance with industry standards.

About Pexip

Pexip provides seamless video communication for organizations that require flexibility, security, and control. In healthcare, Pexip Secure Meetings for Healthcare supports safe, reliable communication for clinical workflows such as virtual care, patient interaction, and collaboration across care teams. Designed for regulated environments, Pexip helps healthcare organizations keep data private, workflows simple, and conversations secure.
